

MediStrip

Fiber Stripper for the Medical Market (steam-sterilizable)

MediStrip was specially developed for use in the medical field. To distinguish strippers for different fiber diameters the MediStrip comes with different laser markings.

0.70/1.2 e. g. means:

- diameter of the closed blade 700 μm
- diameter of the front bore hole 1.2 mm

It is available for all common fiber types from 200 μm to 1100 μm and saves money because it can be used over and over again under sterile conditions.

Name	Suitable for	Part number
MediStrip 0.30/0.6	Fibers with outer diameter 230 – 280 μm	2007838
MediStrip 0.35/0.5	Fibers with outer diameter 280 – 330 μm	2007841
MediStrip 0.40/0.8	Fibers with outer diameter 330 – 380 μm	2007842
MediStrip 0.45/0.8	Fibers with outer diameter 380 – 430 μm	2007865
MediStrip 0.50/0.9	Fibers with outer diameter 430 – 480 μm	2007839
MediStrip 0.55/0.9	Fibers with outer diameter 480 – 530 μm	2007857
MediStrip 0.60/1.2	Fibers with outer diameter 530 – 580 μm	2007845
MediStrip 0.65/1.2	Fibers with outer diameter 580 – 630 μm	2007846
MediStrip 0.70/1.2	Fibers with outer diameter 630 – 680 μm	2007840
MediStrip 0.75/1.4	Fibers with outer diameter 680 – 730 μm	2007859
MediStrip 0.80/1.4	Fibers with outer diameter 730 – 780 μm	2007860
MediStrip 0.85/1.4	Fibers with outer diameter 780 – 830 μm	2007861
MediStrip 0.90/1.5	Fibers with outer diameter 830 – 880 μm	3003791
MediStrip 0.95/1.5	Fibers with outer diameter 880 – 930 μm	2007862
MediStrip 1.10/1.5	Fibers with outer diameter 1030 – 1080 μm	2007864
