Press Release

Custom APD Arrays

APD-arrays are now available from LASER COMPONENTS, enabling new applications in LIDAR and ACC, adaptive cruise control. A typical 12-element array will be presented at Photonics West and a preliminary datasheet is available now. Arrays will be offered on a custom basis with number and dimension of the individual elements tailored to the specific requirements of each application.

The Company

LASER COMPONENTS specializes in the development, manufacture, and sale of components and services in the laser and optoelectronics industry. At LASER COMPONENTS, we have been serving customers since 1982 with sales branches in five different countries. We have been producing in house since 1986 with production facilities in Germany, Canada, and the United States. In-house production makes up approximately half of our sales revenue. A family-run business, we have more than 200 employees worldwide.
