Press Release

Countless Possibilities

New Catalog for Comprehensive Overview on Laser Optics

For LASER World of PHOTONICS, LASER COMPONENTS will issue a new catalog providing a comprehensive overview of the company's wide range of dielectric coatings, substrates and materials.

Whether it be mirrors, filters, or polarizers, lenses, prisms or beam separators - optics are the key components of laser technology, fulfilling numerous tasks in beam shaping and direction. There rarely is an off-the-shelf solution. LASER COMPONENTS has specialized in designing and producing custom made optics by choosing the right combination of the many raw materials available.

"Our Laser Optics catalogue is different from others, as we put our focus on the wide range of possibilities, rather than a clearly defined set of products", says Barbara Herdt, product engineer at LASER COMPONENTS. "In close cooperation with our customers, we search all these options for the solution that matches their specifications. During this process, we not only recommend a coating technology, but we also select the right materials."

The catalog is available to download on the LASER COMPONENTS website, or it can be ordered as a free printed version.

A selection of laser optics will be on show at the LASER COMPONENTS booth B3.303.

Trade Shows

LASER World of Photonics, June 26 - 29 2017, Messe Munich, **Booth B3.303**
Sensors Expo & Conference, June 28 - 29, 2017, San Jose, CA, USA, **Booth 225**
enova Paris, September 19 - 21, 2017, Paris, France
Photonex Coventry, October 11 - 12, 2017, Ricoh Arena, Coventry, Great Britain, **Booth D15**

The Company

LASER COMPONENTS specializes in the development, manufacture, and sale of components and services in the laser and optoelectronics industry. At LASER COMPONENTS, we have been serving customers since 1982 with sales branches in five different countries. We have been producing in house since 1986 with production facilities in Germany, Canada, and the United States. In-house production makes up approximately half of our sales revenue. A family-run business, we have more than 200 employees worldwide.
