

colorPol® polarizers

colorPol® IR 1550 AC4 T1 HT

Developed to match special needs of NIR applications between 1500 nm and 1600 nm. This polarizer utilizes dichroism of silver nanoparticles in glass to achieve superior contrast and durability.

Custom shapes, sizes and patterned structures are possible due to larger manufactured substrates. For assistance please contact your CODIXX Sales Engineer or one of the local distributors with your custom requirements.

Typical contrast (black) and transmittance with AR-coating C1550 (red)
