

## Press Release

# Complete Package with Components for Four Optical Superstructures

### 3D Optix: 4-in-1 Optomechanics Bundle

In a complete 4-in-1 package, 3D Optix now offers all optomechanical components with which four sophisticated experiments can be carried out easily:

- Michelson interferometer (Ø 1"/25 mm)
- Mach-Zehnder interferometer autocorrelator (Ø 1"/25 mm)
- Intensity autocorrelator (Ø 1"/25 mm)
- Broadband pump-probe experiment (Ø 1"/25 mm)

The bundle contains wall elements, floor and ceiling elements, and mounts for the required lenses and mirrors.

The decisive advantage of 3D Optix' novel approach is the option of creating three-dimensional structures to carry out experiments in a space-saving way even under cramped conditions. In addition, partial elements such as delay lines can be set up as independent subunits. These elements can then be quickly and easily integrated into an existing structure and removed again.

#### Trade Shows

ANGACOM, June 04 – 06, 2019, Cologne, Germany, Booth 7.B9
Photonex Glasgow, June 05, 2019, University of Strathclyde, UK, Booth G25
Sensors Expo & Conference, June 25 – 27, 2019, San Jose, CA, USA, Booth 419
LASER World of PHOTONICS, June 24 – 27, 2019, Munich, Germany, Booth B3.303
SPIE Optics+Photonics, August 13 – 15, 2019, San Diego, CA, USA, Booth 425
ECOC, September 22 – 26, 2019, Dublin, Ireland, Booth 337
Photonex Europe, October 09 – 10, 2019, Ricoh Arena, Coventry, UK, Booth D15

#### The Company

LASER COMPONENTS specializes in the development, manufacture, and sale of components and services in the laser and optoelectronics industry. At LASER COMPONENTS, we have been serving customers since 1982 with sales branches in five different countries. We have been producing in house since 1986 with production facilities in Germany, Canada, and the United States. In-house production makes up approximately half of our sales revenue. A family-run business, we have more than 230 employees worldwide.
