

November 26 – 27, 2019

International UV WORKshop in Olching

After our successful premiere at LASER COMPONENTS in 2017, we are organizing an international WORKshop on UV technologies together with the industry association SPECTARIS for the second time. Once again, around 80 participants are expected to attend the discussion on the various technical aspects of short-wave radiation, which will be held on November 26 and 27, 2019.

The event program is divided into different subject blocks: emission, transmission, detection, and applications. Thirty-five presentations will cover topics such as the advantages of disruptive UVC LEDs in disinfection solutions, the manufacture of low-absorption optics for UV applications, and the use of UV lasers in quantum technology.

“While standard solutions have already been established in other spectral ranges for most applications, science and technology in the UV spectrum often still require new solutions,” says Dr. Olga Stroh-Vasenev of LASER COMPONENTS. “The exchange of knowledge and experience is, therefore, particularly important in this industry. Our WORKshop offers the perfect opportunity for such an exchange. This was proven by the positive response we received after the last event and the great demand for a regular series of events.”

Trade Shows

AnalytiX-2019 Europe, November 13 – 15, 2019, Berlin
SPIE Photonics West, February 04 – 06, 2020, San Francisco, USA, **Booth 449**
ATX West Automation, February 11 – 13, 2020, Anaheim, CA, USA, **Booth 4165**
SPIE Photonics Europe, March 31 – April 01, 2020, Strasbourg, France, **Booth 521**
ANGACOM, May 12 – 14, 2020, Cologne, Germany

The Company

LASER COMPONENTS specializes in the development, manufacture, and sale of components and services in the laser and optoelectronics industry. At LASER COMPONENTS, we have been serving customers since 1982 with sales branches in five different countries. We have been producing in house since 1986 with production facilities in Germany, Canada, and the United States. In-house production makes up approximately half of our sales revenue. A family-run business, we have more than 230 employees worldwide.
