

Pure Optical Switches from HUBER + SUHNER Polatis

New at LASER COMPONENTS: Fiber Optic Matrix Switches

HUBER + SUHNER Polatis is one of the world's leading manufacturers of optical matrix switches. In Germany, HUBER + SUHNER Polatis' network components are now also distributed by LASER COMPONENTS.

The right switch series is available for each area of application and each network structure: The 3000 series is available for multi-mode applications with up to 16 x 16 channels, the 6000 series is available for 8 x 8 channels to 192 x 192 channels, and the protection service switches of the 6000n PSS series are available for 16 x 16 channels. The 7000 series for 384 x 384 channels is the cream of the crop. These matrix switches support all modern network management protocols. Since they are equipped with NETCONF and RETCONF control interfaces on a standard basis, they can also be used in software-defined networks (SDNs).

Fiber optic matrix switches are important components for data transmission in fiber optic networks and test environments. Their fields of application range from data centers to telecommunications, network monitoring, and government applications.

Trade Shows

Sensors Expo & Conference, June 25 – 27, 2019, San Jose, CA, USA, **Booth 419**
LASER World of PHOTONICS, June 24 – 27, 2019, Munich, Germany, **Booth B3.303**
SPIE Optics+Photonics, August 13 – 15, 2019, San Diego, CA, USA, **Booth 425**
ECOC, September 22 – 26, 2019, Dublin, Ireland, **Booth 337**
Photonex Europe, October 09 – 10, 2019, Ricoh Arena, Coventry, UK, **Booth D15**

The Company

LASER COMPONENTS specializes in the development, manufacture, and sale of components and services in the laser and optoelectronics industry. At LASER COMPONENTS, we have been serving customers since 1982 with sales branches in five different countries. We have been producing in house since 1986 with production facilities in Germany, Canada, and the United States. In-house production makes up approximately half of our sales revenue. A family-run business, we have more than 230 employees worldwide.
