Press Release

Up to 15% Discount on Regular Checkups

Service and Repair of Fiber Optic Splicers

In the long run, even FITEL Furukawa's modern, low-maintenance splicing and fiber cleaving tools will only work flawlessly if they are cleaned and checked regularly. As an authorized service partner of the manufacturer, LASER COMPONENTS recommends an annual check. Each inspection is documented in a service booklet, so that customers can always keep track of their appointments. If the tools are turned in in time for the next checkup, the customer will receive a 10% discount on the service costs. Those who deliver a cleaver and a splicer at the same time even save 15%*.

LASER COMPONENTS is a qualified maintenance and repair workshop for all FITEL Furukawa splicing and cleaving tools. In addition to annual inspection and cleaning, the company also offers a comprehensive repair service. Defective elements, such as the mainbase, lenses, or the support battery, are always replaced by original parts. More complex repairs are also carried out competently.

*The loyalty discount is granted if the device is received by LASER COMPONENTS GmbH in time for the next registered service date. The discount is granted on the current price of the service and does not apply to replacement wear parts, spare parts, or necessary repairs.

The Company

LASER COMPONENTS specializes in the development, manufacture, and sale of components and services in the laser and optoelectronics industry. At LASER COMPONENTS, we have been serving customers since 1982 with sales branches in five different countries. We have been producing in house since 1986 with production facilities in Germany, Canada, and the United States. In-house production makes up approximately half of our sales revenue. A family-run business, we have more than 220 employees worldwide.
