

Better with VIAVI: Replacing your Discontinued Copper Tester

Enterprise Networks have changed significantly in the past 15 years, so it's no surprise that some of your test tools are no longer able to support your needs. As legacy tool manufacturers discontinue old copper network testers, technicians are faced with the reality that it's time to change.

Before just updating to a newer model from your legacy tester, you owe it to your team to see how VIAVI solutions can provide a better answer for your enterprise testing needs, today and tomorrow.

- VIAVI provides BOTH combined (Copper/Fiber) and dedicated Test Solutions
- ALL of our solutions equip technicians with faster workflow with Full Control at both ends of a link to give them [twice the productivity of other testers](#).
- With dedicated Copper & Fiber test instruments, BOTH devices can be used at the same time (double the utility of your investment).
- Reporting - All of these instruments are supported by J-Reporter
- Workflow - All of these instruments are supported in [CERTIFI](#) cloud & mobile workflow solution
- VIAVI Support Plans cost less and are better tuned to actual customer needs

Certifier 10G Dedicated Copper Tester

Ideal for technicians just testing up to Category 6A. If you aren't working on Category 8, this keeps your costs affordable and is the perfect teammate with an OLTS-85P to accomplish copper and fiber testing with dedicated test solutions.

Certifier 40G Combined Copper/Fiber Tester

For technicians that prefer an all-in-one tester. Simply change the modules on the device.

OLTS-85P Dedicated Fiber Tester

Not just an "add on" to a copper tester. SmartClass Fiber solutions empower technicians at both ends of the test to ensure best practices in fiber inspection and testing.
