

M12/USB 12 V CONNECTING CABLE

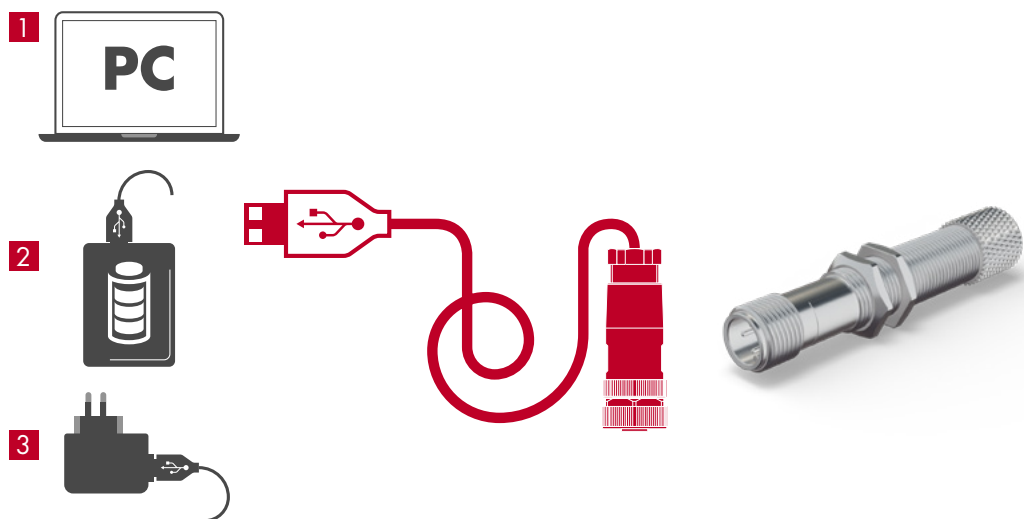

The M12/USB cable creates a connection between a laser module with M12 connector and any USB power supply. This can be the USB port of a computer (1), a commercially available power bank (2) or a USB power supply (3). In the cable, the USB standard voltage is transformed from 5V to 12V, so that all laser modules that require a voltage of at least 10V can also be operated.

SPECIFICATIONS

Connection laser side [V mA]	12 (± 0.5) max. 600 Pin 1: + Pin 3: GND
USB-A connection [V A]	5 max. 2.0
Cable length [m]	1.5
