## Press Release

### Short Delivery Times

#### Custom Quartz Glass Lenses

LASER COMPONENTS manufactures high-quality custom quartz glass lenses within a very short time. At the production site in Olching, substrates with diameters from 0.5 to 2 inches can be shaped into plano-convex, plano-concave, biconvex, biconcave, and meniscus lenses with radii of curvature from 12 mm to 15,000 mm. After grinding, all lenses are given a fine polish. LASER COMPONENTS guarantees its customers a surface accuracy of  $\lambda/10$ . Each individual optic undergoes an interferometric check at outgoing goods inspection. At the customer's request, LASER COMPONENTS creates a measurement protocol for each lens. Of course, the lenses can also be equipped with AR coatings or mirror coatings upon request in our in-house coating facilities.

#### The Company

LASER COMPONENTS specializes in the development, manufacture, and sale of components and services in the laser and optoelectronics industry. At LASER COMPONENTS, we have been serving customers since 1982 with sales branches in five different countries. We have been producing in house since 1986 with production facilities in Germany, Canada, and the United States. In-house production makes up approximately half of our sales revenue. A family-run business, we have more than 230 employees worldwide.
